

African Windpower

NEW AWP3.7 Wind Generator

New strong efficient GRP composite blades

Heavy duty slip rings

Rugged, simple construction. Gravity furling system. Only 3 moving parts

NEW features :

- Higher output alternator 2000 watts grid connect
- High strength composite GRP blades
- Improved blade profile and finish for higher efficiency
- Heavy duty slip ring equipped yaw head
- Marine version Hot Dip Galvanised
- Maintenance free sealed yaw bearings, nylon tail bushes
- New controller design – turbine side dumping
- Improved shipping crate design

Original features:

- Extra large rotor diameter for high energy production and low RPM
- Low RPM yields exceptionally quiet operation and low wear
- Simple gravity yaw system prevents over speed
- Ultra simple assembly
- 30 pole permanent magnet alternator
